

Disburser Investigator/Submitter User Guide

Disburser is a web-based tool for submitting and managing disbursement requests for specimen and/or data from biorepositories across Robert H. Lurie Comprehensive Cancer Center of Northwestern University. The application allows a user to:

- View in a centralized location available specimen and data biorepositories.
- See an overview of the contents of each specimen and data biorepository.
- Submit disbursement requests to specimen and data biorepositories.
- Track the approval and fulfillment of disbursement requests.
- Log in with a Northwestern NetID or setup an account with an email address.

This user guide is meant for investigators or submitters of disbursement requests to Disburser. Other user guides cover using Disburser as a biorepository member committee member, biorepository coordinator or biorepository administrator.

Access

Permission to use Disburser is available to all owners of a Northwestern NetID and password. Alternatively, non-Northwestern individuals can setup an account with an email address and a password of their choice. Disburser is located at the following URL:

<https://disburser.cancer.northwestern.edu/>

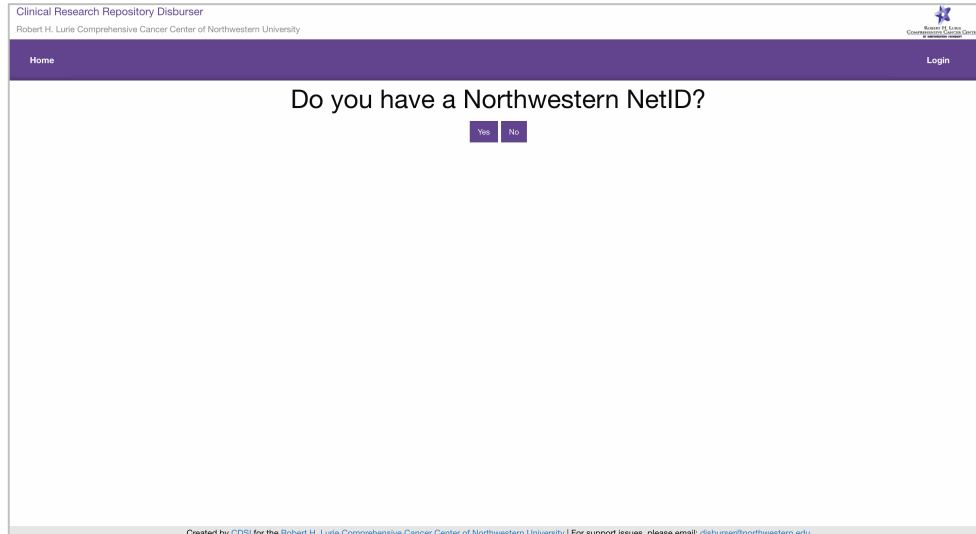

The screenshot shows the Disburser web application interface. At the top, there is a header with the text "Clinical Research Repository Disburser" and "Robert H. Lurie Comprehensive Cancer Center of Northwestern University". Below this is a navigation bar with "Home" and "Login" links. The main content area starts with a "Welcome" message, followed by a brief description of the system. Below this, there are two sections: "New User?" and "Existing User?". The "New User?" section includes instructions on how to browse repositories, sign in with a NetID, or create a new account. The "Existing User?" section includes instructions on how to log in, add a new request, or check the status of existing requests. At the bottom, there is a "Repositories" section with a search bar and a table listing various biorepositories, including the Gynecology Oncology Biospecimen Bank, Nervous System Tumor Bank, Ovarian Cancer Early Detection & Prevention Biospecimen Bank, and Prostate Spore. Each repository has a "View" link next to it. The footer of the page contains the text "Created by CDSI for the Robert H. Lurie Comprehensive Cancer Center of Northwestern University | For support issues, please email: disburser@northwestern.edu".

Login with a Northwestern NetID

Click the 'Login' link in the upper right corner. You will be asked if you have a Northwestern NetID.

This screenshot shows the login interface for the Clinical Research Repository Disburser. The page has a purple header with 'Home' on the left and 'Login' on the right. The main content area asks 'Do you have a Northwestern NetID?' with two buttons: 'Yes' and 'No'. The footer contains text about the system being created by CDSI for the Robert H. Lurie Comprehensive Cancer Center of Northwestern University, with a support email address.

Submitting a Disbursement Request

Before logging into Disburser, you will see on the home page a list of all the available biorepositories.

The screenshot shows the 'Clinical Research Repository Disburser' home page. At the top, there's a header with the site name and a 'Login' button. Below the header, a 'Welcome' message is followed by a brief description of the system. The page is divided into two main sections: 'New User?' and 'Existing User?'. The 'New User?' section includes instructions on how to browse repositories, use a Northwestern NetID, or create a new account by clicking 'Sign up'. The 'Existing User?' section has a 'Login' button and instructions on how to add new requests or check the status of existing ones. Below these sections is a 'Repositories' table with a search bar and a list of repositories: Gynecology Oncology Biospecimen Bank, Nervous System Tumor Bank, Ovarian Cancer Early Detection & Prevention Biospecimen Bank, and Prostate Spore. Each repository has a 'View' link. At the bottom, there's a footer with contact information for support.

Name	View
Gynecology Oncology Biospecimen Bank	View
Nervous System Tumor Bank	View
Ovarian Cancer Early Detection & Prevention Biospecimen Bank	View
Prostate Spore	View

Click 'View' on the biorepository that interests you. This will bring you to the home page of the biorepository.

The screenshot shows the 'Repository: Prostate Spore' page. At the top, there's a header with the site name and a 'Login' button. Below the header, the title 'Repository: Prostate Spore' is displayed. A 'Make a request?' button is visible. The page is divided into four tabs: 'General', 'Data Dictionary', 'IRB Template', and 'Custom Request Form'. The 'General' tab is selected, showing a detailed description of the SPORE repository, including its size, patient population, and sample types. Below the description, there are sections for 'IRB Process', 'Scientific Justification', and 'Questions'. The 'IRB Process' section explains the steps for obtaining approval. The 'Scientific Justification' section describes the requirements for the justification document. The 'Questions' section provides contact information for the database programmer, the SPORE Biospecimen director, and the SPORE Biospecimen Procurement Core. At the bottom, there's a footer with contact information for support.

General	Data Dictionary	IRB Template	Custom Request Form
<p>The SPORE repository has more than 50,000 specimen aliquots from more than 4,500 consented patients with prostate cancer treated at Northwestern Memorial Hospital and NorthShore University Health System. In addition to frozen tissue on nearly 3,500 patients, the repository has blood (serum, plasma, peripheral blood mononuclear cells, and blood spots) and urine samples. Sample accrual has been expanded to include not only patients undergoing surgery, but also non-surgical patients with advanced disease who are undergoing radiotherapy or chemotherapy, thus spanning the spectrum of disease. Corresponding formalin-fixed paraffin-embedded (FFPE) tissue is available on each prostatectomy case, and biopsies are available in most cases as well. More than 50 tissue microarrays have been generated and are available to interested investigators for research studies. Detailed clinical and pathologic data associated with each specimen is uploaded by data coordinators into the SPORE database sample management systems with appropriate protection of patient confidentiality.</p> <ul style="list-style-type: none">IRB Process: IRB approval or exemption must be obtained prior to release of data or specimens. The request form will ask you input your IRB number or declare your your IRB exemption.Scientific Justification: The request form will ask you to attach a 'Methods/Justifications' document that should contain a scientific explanation justifying the disbursement of the clinical data and/or clinical specimens.Questions:<ul style="list-style-type: none">For all other questions about the specimen request process, please contact:<ul style="list-style-type: none">Michael Gurley Database Programmer Prostate SPORE m-gurley@northwestern.eduTo discuss your specimen needs, please contact a SPORE Biospecimen director:<ul style="list-style-type: none">Jian-Jun Wei, MD Co-Director, SPORE Biospecimen Procurement Core jjan-wei@northwestern.edu 312.926.1815Ximing Yang, MD PhD Co-Director, SPORE Biospecimen Procurement Core xyang@northwestern.edu			

Disburser Investigator/Submitter User Guide

The biorepository homepage provides an overview of the operation and contents of the biorepository. If you are interested in submitting a disbursement, click the 'Make a request!' button. This will bring you to the 'New Request' page for the chosen biorepository.

The screenshot shows the 'New Request' form for 'Prostate Spore'. The form is titled 'New Request for: Prostate Spore' and includes a note '*Indicates required field'. The form fields are as follows:

- Submitter:** Michael Gurley
- Investigator *:** Bob Jones
- Title *:** Cure Cancer
- IRB Number *:** 123
- Feasibility?:** ☐ Only aggregate numbers will be provided for feasibility requests. No approved IRB protocol is required.
- Methods/Justifications *:** methods_and_justifications.docx
- Cohort Criteria *:** African-American patients with Gleason >= 8 and recurrence within 3 years of diagnosis.
- Data for cohort *:** All demographics, treatment and survival.
- Specimens:** A table with columns: Type, Quantity, Volume, and Comments. The table contains one row: Type: Frozen Tissue, Quantity: 100, Volume: 5 mg, Comments: (empty). There is a 'Save' button next to the Comments field.
- Status:** ☒ Draft ☐ Submitted. A note says '*Submitted* will send your request for review.' There are 'Save' and 'Cancel' buttons.

At the bottom, it says: 'Created by CDSI for the Robert H. Lurie Comprehensive Cancer Center of Northwestern University | For support issues, please email: disburser@northwestern.edu'

The 'New Request' page asks you to fill in the following fields:

- 'Investigator': the principal investigator of the disbursement request.
- 'Title': the title of the research project for the disbursement request.
- 'IRB Number': the IRB number of the research project for the disbursement request. Not required if 'Feasibility' is checked.
- 'Feasibility': Boolean flag marking whether a disbursement request is for feasibility. Only aggregate numbers will be delivered for feasibility requests. No approved IRB research project is required.
- 'Methods/Justifications': Upload a document that provides a scientific justification for the receipt of data/specimens.
- 'Cohort Criteria': Specify the selection criteria for the cohort of patients.
- 'Data for cohort': Specify additional data points to be disbursed for the cohort of patients.
- 'Specimens': Specification of the 'Type', 'Quantity', 'Volume' and 'Comments' of the requested specimens.
- 'Status': A disbursement request can be saved with a status of 'Draft' or 'Submitted'.
 - Saving a disbursement request with a status of 'Draft' will not submit the request for review to the biorepository. A 'Draft' disbursement request can be saved with a status of 'Submitted' later.

Disburser Investigator/Submitter User Guide

- Saving a disbursement request with a status of 'Submitted' will notify the biorepository administrators to begin processing the disbursement request.

Upon submission of a disbursement request with a status of 'Submitted', you will receive an email confirmation.

Tracking Disbursement Requests.

You will be able to view the progress of your disbursement requests, by clicking the 'Requests' menu item.

The screenshot displays the 'Clinical Research Repository Disburser' web application. The header includes the title 'Clinical Research Repository Disburser' and the affiliation 'Robert H. Lurie Comprehensive Cancer Center of Northwestern University'. A navigation bar shows 'Home' and 'Requests' (the active tab). The user's profile 'Profile (mjg994)' and a 'Log out' link are visible in the top right. The main content area is titled 'Requests' and features a search filter section with dropdown menus for Repository (all), Status (all), Data Status (all), Specimen Status (all), and Feasibility (all), along with a search input field and 'Search' and 'Clear' buttons. Below this is a table with columns: Repository, Title, Investigator, IRB Number, Feasibility, Status, Data Status, and Specimen Status. A single row is visible with the following data: Repository: Prostate Spore, Title: Cure Cancer, Investigator: Bob Jones, IRB Number: 123, Feasibility: No, Status: submitted, Data Status: not started, Specimen Status: not started. An 'Edit' link is present at the end of the row. At the bottom of the table area, there is a 'Repository' dropdown menu with the text 'Select a repository' and a 'Make a request' button. The footer contains the text: 'Created by CDSI for the Robert H. Lurie Comprehensive Cancer Center of Northwestern University | For support issues, please email: disburser@northwestern.edu'.

The submitter of a disbursement request will be notified via email as a disbursement requests changes statuses. A disbursement request has 3 different statuses.

- 'Status': The overall status of the disbursement request tracks its progress from submission to approval or denial.
 - 'Draft': An initial state of the disbursement request. 'Draft' disbursement requests will not be sent to the attention of the biorepository administrators.
 - 'Submitted': A 'Submitted' disbursement request will be sent to the attention of the biorepository administrators.
 - 'Committee Review': Notifies the biorepository committee members to vote on the disbursement request. Committee votes will not be visible to the disbursement request submitter.

Disburser Investigator/Submitter User Guide

- 'Approved': An 'Approved' disbursement request will send an email to the submitter that the disbursement request has been approved. The email will include instructions on how to work with biorepository coordinators to fulfill the disbursement request.
 - 'Denied': A 'Denied' disbursement request will send an email to the submitter that the disbursement request has been denied by the biorepository committee.
 - 'Canceled': A 'Canceled' disbursement will send an email to the submitter that a disbursement request has been canceled. A submitter may cancel their own request as long as the disbursement request has a status of 'Draft' or 'Submitted'. All other statuses can only be canceled by the biorepository administrator.
- 'Data Status': The 'Data Status' tracks the progress of the fulfillment of the data component of a disbursement request. At times, the fulfillment of a disbursement request's data will be handled separately from its specimen component.
 - 'Not Started': The initial state of a disbursement request's data status. 'Not Started' means a biorepository coordinator has not begun the process of fulfilling the data for the disbursement request.
 - 'Data Checked': A 'Data Checked' data status means a biorepository coordinator has queried the requisite biorepository and the cohort criteria *can* be met. An email notification will be sent to the submitter that a disbursement request has a data status of 'Data Checked'.
 - 'Insufficient Data': An 'Insufficient Data' data status means the biorepository coordinator has queried the requisite biorepository and the cohort criteria *cannot* be met. An email notification will be sent to the submitter that a disbursement request has a data status of 'Insufficient Data'.
 - 'Query Fulfilled': A 'Query Fulfilled' data status means the biorepository coordinator has prepared and delivered the disbursement request data to the submitter. An email notification will be sent to the submitter that a disbursement request has a data status of 'Query Fulfilled'.
- 'Specimen Status': The 'Specimen Status' tracks the progress of the fulfillment of the specimen component of a disbursement request. At times, the fulfillment of a disbursement request's specimens will be handled separately from its data component.
 - 'Not Started': The initial state of a disbursement request's specimen status. 'Not Started' means a biorepository coordinator

Disburser Investigator/Submitter User Guide

has not begun the process of fulfilling the specimens for the disbursement request.

- 'Inventory Checked: An 'Inventory Checked' data status means a biorepository coordinator has checked the requisite biorepository specimen inventory and the disbursement request for specimens can be met. An email notification will be sent to the submitter that a disbursement request has a specimen status of 'Inventory Checked'
- 'Insufficient Specimens': An 'Insufficient Specimens' specimen status means a biorepository coordinator has checked the requisite biorepository specimen inventory and the disbursement request for specimens *cannot* be met. An email notification will be sent to the submitter that a disbursement request has a specimen status of 'Insufficient Specimens'.
- 'Inventory Fulfilled': An 'Inventory Fulfilled' specimen status means a biorepository coordinator has prepared and delivered the disbursement request specimens to the submitter. An email notification will be sent to the submitter that a disbursement request has a specimen status of 'Inventory Fulfilled'.

A submitter may click on the 'Edit' link to view the details of a disbursement request. The status history, data status history and specimen status history are available for inspection. Within the edit screen of a disbursement request, a user may cancel a request by clicking the 'Cancel' button. A user may also update the details of a disbursement request. A disbursement request may be updated after it has been submitted. However, this should only be done in consultation with the biorepository administrator or biorepository coordinator.

Request for: Prostate Spore

Submitter: Michael Guitley

Investigator: Bob Jones

Title: Cerv Cancer

of Number: 123

Feasibility? ☐ Only aggregate numbers will be provided for feasibility requests. An approved IRB protocol is required.
